

Flowering Crabapples are a group of flowering trees prized for their vivid bloom colors, and brightly colored fruit.

Malus 'Candied Apple'

Malus x 'Candied Apple'
Candied Apple Weeping Crabapple
Height: 15'
Width: 15'
Shape/Form: Weeping
Flower: Pink
Fruit: Bright Red

'Candied apple' Weeping Crabapple is a great weeping tree. It's foliage has a red tint to it, and the pink flowers and weeping habit really set this tree apart from the others. Excellent disease resistance.

Malus 'Coralburst'

Malus x 'Coralburst'
Coralburst Crabapple
Height: 15'
Width: 15'
Shape/Form: Very dense, rounded.
Flower: Double rose
Fruit: Red-orange

'Coralburst' Crabapple is a great smaller variety. It's defining characteristic is it's perfectly round head. 'Coralburst' is extremely compact and dense, so you will get a lot of bloom out of a small tree!!

Malus 'Indian Magic'

Malus x 'Indian Magic'
Indian Magic Crabapple
Height: 15'
Width 15'
Shape/form: Upright spreading
Flower: Deep Pink
Fruit: Orange-red

'Indian Magic' Crabapple is a great crabapple for fruit. It has a lot of apples on it that tend to last longer than others. Good Disease resistance.

Malus 'Prairie Fire'

Malus x 'Prairiefire'
Prairie Fire Crabapple
Height: 20'
Width: 20'
Shape/form: Upright rounded
Flower: Pinkish-red
Fruit: Dark Red

'Prairiefire' Crabapple is a great all around tree, with it's red leaves, bright pink-red flowers, and red fruit. Extremely disease resistant. One of the best red-leaved crabapples.

Malus 'Red Baron'

Malus x 'Red Baron'
Red Barron Crabapple
Height: 18'
Width: 8'
Shape/form: Upright, columnar
Flower: Dark Red
Fruit: Dark Red

'Red Barron' Crabapple is another outstanding red-leaved crabapple. It's defining characteristics are it's narrow upright habit and deep red complexion.

Malus floribunda

Malus floribunda
Japanese Flowering Crabapple
Height: 18'
Width: 25'
Shape/form: Spreading, wider than tall.
Flower: Pink buds open to bluish flowers
Fruit: Lots of yellow-red

The Japanese flowering crabapple is one of the oldest varieties around, yet is still one of the most popular. It's great disease resistance make it a worthwhile tree. In the Spring, you won't see any of the emerging leaves through the floral mass. Truly an impressive tree.

Malus 'Golden Raindrops'

Malus x 'Golden Raindrops'
Golden Raindrops Crabapple
Height: 20'
Width: 15'
Shape/Form: Upright, vase-shaped
Flower: White
Fruit: Golden-yellow

Golden Raindrops is a newer variety of crabapple that is simply outstanding. The first thing you will notice is probably the leaves. They are very deeply cut and look more like a maple leaf than a crabapple. The white flowers are profuse, and the golden apples look striking!! An unusual tree.

Malus 'Harvest Gold'

Malus x 'Harvest Gold'
Harvest Gold Crabapple
Height: 15'
Width: 15'
Shape/form: Upright
Flower: White
Fruit: Golden

'Harvest Gold' Crabapple is best known for it's rich golden fruit that persist well into Fall. Very disease resistant. Flowers are large.

Malus sargentii

Malus sargentii
Sargent Crabapple
Height: 8'
Width: 12'
Shape/form: Low, spreading dwarf
Flower: White
Fruit: Red

Sargent Crabapple is another species crabapple that holds its own against the newer hybrids. Sargent is a natural dwarf, and it is probably the most disease-resistant crabapple.

Malus 'Snowdrift'

Malus x 'Snowdrift'
Snowdrift Crabapple
Height: 20'
Width: 20'
Shape/form: Upright, rounded
Flower: White
Fruit: Orange

When the Snowdrift Crabapple blooms, all you will see is a mass of white. One of the heaviest blooming crabapples, and probably the best pure white. It is also one of the best pollenizers for fruiting apple trees due to it's profuse blooming.

Malus tschonoskii

Malus tschonoskii
Tschonoski Crabapple
Height: 28'
Width: 14'
Shape/form: Upright, narrow oval
Flower: White
Fruit: Green

Tschonoski Crabapple is actually grown more for it's general appearance than bloom and fruit. It has a narrow, upright, symmetrical form. It's foliage is light green with a bright silver underside, and it's Fall color is an outstanding orange-red!
